EDIT DECISION LIST – RECORDER

for Media Composer® Premiere® FCP®

tailor made for every configuration and requirement

EDL-REC blk

EDL-REC pro

EDL-REC 19"

The EDL-RECs recording live cuts & transitions from the vision mixer
and creating ready-made Edit Decision Lists in multicamera-mode
for all common non-linear editing systems.

This enables faster, superior and more efficient post-production.
Up to 50 % editing time in the post-processing and accordingly budget can be saved.

Usage: Multicamera Recordings & Live-Broadcasts with Post-production
Formats: Talk, Quiz, Show, Concert, Theatre, Opera, Musical, Event
Users: TV, Entertainment, Business, Culture, Industry

Place live markers with up to 5 hand-held marker-keypads into the timeline
For: Executive Producers, Producers, Directors, Editors, Editorial Staff, Authors, Scripter, Assistants
What: Highlights, Shortenings, Corrections, Audio-/Video Adjustments, Starts, Ends, Parts
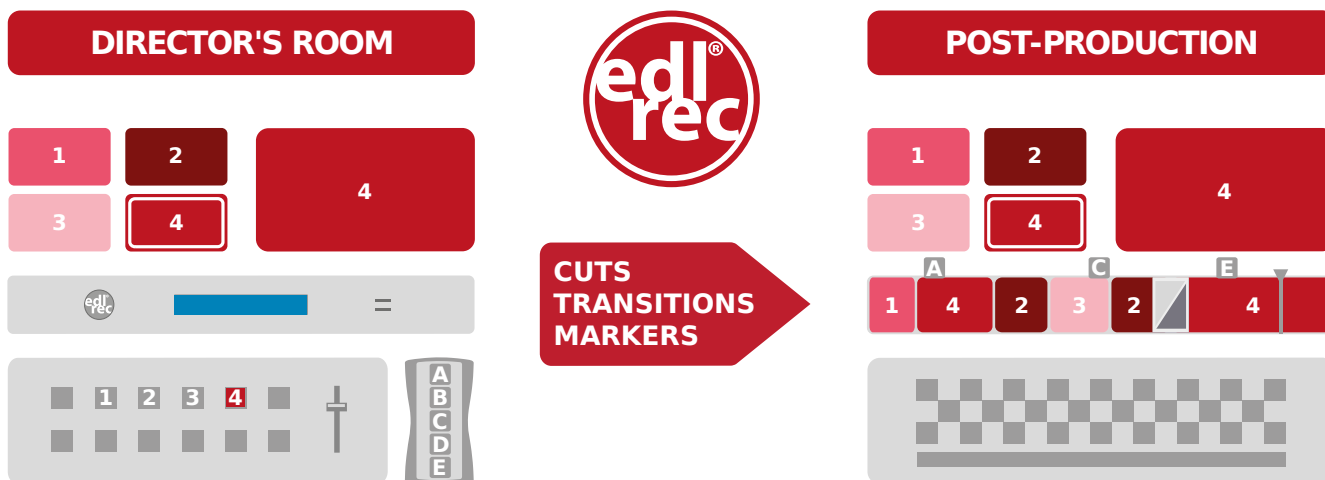

increases quality – reduces costs.

Post-production by comparison

without EDL
- one continuous programme-recording + sources
- programme INs & OUTs have to be searched & marked time consumpting
- sources In & length has to be searched & marked
- the source will be patched over programme
- this procedure repeats until end of work

with EDL-REC Edit Decision List
- all sources + PGM
- all in sync
- all cuts and transitions from the recording
- simply switch sources
- simply trim sources direct

DIRECTOR'S ROOM

POST-PRODUCTION

CUTS TRANSITIONS MARKERS

Pre-/Offset = ALWAYS everything IN SYNC!

Radio cameras, vision mixers, DVEs, several timecode generators, synchronizers, …
only a few examples why multicamera-projects are not always automatic in sync.
While generating the EDLs in the EDL-REC every source can get a individual pre- or offset in frames.
